

CONTRIBUTORS

Michael Barkun is Professor of Political Science at Syracuse University, New York. From 1974–75 he held a Senior Fellowship from the National Endowment for the Humanities to do research into millennialism. His current research is concerned with changing patterns of disaster and millennial movements in England and America from 1750 to the present.

Linda Brookover Bourque is an Assistant Professor on the Faculty in the School of Public Health and is associated with the Institute for Social Science Research at the University of California, Los Angeles, 90024; her current interests focus on public policy formulation and research methodology.

Andrew Cherlin, currently a Graduate Student Fellow at the Russell Sage Foundation, will join John Hopkins University in Baltimore, Maryland, 21218, as Assistant Professor of Social Relations on September 1, 1976.

Juanita L. Crowe is a part time instructor in Sociology at the University of Colorado at Denver, Denver, Colorado 80223, and is interested in the problems of resocialization of those previously involved in religious careers.

Thomas E. Drabek is Professor of Sociology and chairperson of the Department of Sociology at the University of Denver, Denver, Colorado 80210. He has been involved in disaster research for about a dozen years and is currently concluding some longitudinal studies of family functioning after disasters.

Patricia Erickson is currently Assistant Professor of Sociology at the University of

Missouri, Kansas City, Missouri 64110. Her research interests include the development of a theoretical perspective for understanding organizational death.

William H. Key is Vice-Chancellor for Academic Affairs at the University of Denver, Denver, Colorado 80210. His current research interests center around the areas of urban sociology, demography and research methodology. He co-authored an article with Thomas Drabek in the last issue of *Mass Emergencies*.

James Lewis is leader of the Disaster Research Institute, University of Bradford England. An architect trained at the University of Manchester, Mr. Lewis worked as Resident Architect on the University of Bath and the Hong Kong Harbour Tunnel. He also taught at the University of Bristol School of Architecture and continued an architectural practice which became a vehicle for the development of ideas in pre-disaster planning.

Leo G. Reeder who is Professor of Sociology and Professor of Public Health at the University of California, Los Angeles, has research interests in medical sociology, social demography and social psychology and has recently published *Handbook of Scales and Indices of Health Behavior*.

Ralph Turner, in the sociology department at the University of California in Los Angeles, is a former president of the American Sociological Association. He has written extensively in the fields of social psychology and collective behavior.
