

CONTRIBUTORS

John F. Devaney is a Systems Analyst who has worked in the development of analytic techniques and frameworks for systems analysis of non-military systems. He served as Director of Systems Evaluation, Office of Civil Defense, 1958–1965, and as Deputy Director of Research, Office of Civil Defense 1965–1968. He has published numerous research reports on the application of systems analysis techniques to the civil defense system.

Calvin J. Frederick is Chief, Mental Health Disaster Assistance Programs, National Institute of Mental Health. He is an Associate Clinical Professor in the Department of Psychiatry and Behavioral Sciences at the George Washington University School of Medicine, and Assistant Professor in the Department of Psychiatry and Behavioral Sciences, the John Hopkins University School of Medicine.

John P. Keating is Assistant Professor of Psychology, University of Washington. In addition to this work in environmental psychology, Professor Keating also has an interest in the effect of media communications on attitudes and behavior.

Elizabeth Loftus is Associate Professor of Psychology at the same university. Her major field is educational psychology with a special interest in perceptual cues and memory.

Jiri Nehnevajsa is Professor of Sociology and Director of the Center for Urban Research of the University of Pittsburgh.

Joseph Scanlon is a Professor of Journalism at Carleton University in Ottawa, Canada, K1S 5B6. **Brian Taylor** is an Associate Professor

in the same field. The pair have been associated in stand-by research since 1970 and they have published a number of monographs in this field. Professor Scanlon has also contributed a chapter on “Crisis Communications” in Benjamin Singer’s book *Communications in Canadian Society* (second edition).

Robert A. Smith, Deputy Director of Health Care Management, and member of the faculty of the Department of Public Administration at Marywood College, Scranton, Pennsylvania was responsible for the planning, management, and analysis of the sample survey.

Clarence C. Traum, Executive Director of Health Care Management, and **Lorna H. Poole**, Research Assistant for Health Care Management, collaboratively assisted in developing the article. Smith was also responsible for an HEW-sponsored, comprehensive evaluation, documenting the short- and long-range impact of the Susquehanna River flood of 1972 on the health services delivery system of Northeastern Pennsylvania.

Walter Strobe was Director of Research for the Defense Civil Preparedness Agency and its predecessor, the Office of Civil Defense, from 1961 to 1973. Since retirement from the government, he has been active as a Senior Operations Analyst for the Center for Resource and Environmental Systems Studies, Stanford Research Institute, and as Executive Secretary of the American Strategic Defense Association.

Dennis Wenger is an Associate Professor of Sociology at the University of Delaware, Newark, Delaware 19771. He is currently conducting studies on the perceptions of disaster behavior, on which subject he wrote in the first issue of *Mass Emergencies*.
