

CONTRIBUTORS

S. Chaze is with the French Red Cross.

Edward F. Heffron is the Deputy Center Director, Community Services of the Hazleton-Nanticoke Mental Hospital Retardation Center, West Washington Street, Nanticoke, Pa. 18634. He headed the mental health crisis/disaster intervention program in the aftermath of the Wilkes-Barre flood.

Luke L. Hingson is an executive of the Brother's Brother Foundation, concentrating on their disaster relief operations. As such, he has worked in relief programs throughout Latin America.

Phil O'Keefe is Research Fellow at the Disaster Research Unit. After initial work on the Sahel drought he played a major role in the development of the Unit's conceptual hypotheses on the nature of disaster and undertook an analysis of available data on world disaster occurrence. On behalf of the Unit, he has undertaken field work in the Commonwealth of the Bahamas and the Windward Islands.

James Lewis is Director of the Disaster Research Unit at the University of Bradford. The Unit's work has been concentrated on conceptual analysis of the disaster process as it affects less developed countries, and on methodological analysis of planning processes for prevention and preparedness to mitigate effects. He has directed and produced "A Study in Predisaster Planning" in the Bahama Islands and undertaken a Pilot Study to establish methods for insurance against the effects of natural disaster in a ten-country region of the South Pacific. He is continuing research and undertaking projects for the implementation of results from research.

Richard Olson is Assistant Professor of Political Science at the University of Redlands,

California and has major interest in problems of developing nations. He does occasional research and consulting for the Earthquake Engineering Research Institute of Oakland, California.

Robert A. Olson, Executive Director of the California Seismic Safety Commission, 455 Capitol Mall, Ste 535 Sacramento, California 95814, has done field research on earthquakes in Santa Rosa, San Fernando, Managua and Guatemala. He co-edited "Meeting the Earthquake Challenge," a policy report to the California legislature.

T. Joseph Scanlon is Director of the School of Journalism of Carleton University. He also heads Carleton's Emergency Communications Research Unit, which he described in *Mass Emergencies*, Vol. 2 No. 1.

C. de Ville de Goyet, recently with the Research Center in Disaster Epidemiology at the Catholic University of Louvain, Belgium, is now Regional Advisor on Emergency Preparedness and Disaster Relief Coordination in the Pan American Health Organization, Washington, D.C.

Etienne J. Wauty is a medical sociologist and researcher at the Catholic University of Louvain, Belgium; he headed the sociological evaluation of the Red Cross Relief Program in Niger.

Ken Westgate is Research Assistant at the Disaster Research Unit. He has made a study of the human response to the Flixborough Chemical Works explosion in 1974 and undertaken field work with the Unit in the Commonwealth of the Bahamas. He has represented the UK Government at international conferences and is responsible for the Unit's bibliographic material.
