Subscription Information

Mass Emergencies appears in one volume of four issues per year; Vol. 3 covers 1978. The subscription rates are: Dfl. 50.00 or approx. US \$ 20.75 for those individuals who warrant the journal is for their own personal use; and Dfl. 103.00 or approx. US \$ 42.95 for libraries, research institutions, and others. Orders for subscriptions and single issues should be sent to Elsevier Scientific Publishing Company, P.O. Box 211, Amsterdam, The Netherlands. Claims for issues not received should be made within three months of publication of the issues. If not, they cannot be honoured free of charge. Journals are automatically sent by air to the U.S.A. and Canada at no extra cost; and to Japan, Australia and New Zealand at a small additional postal charge.

SUGGESTIONS FOR CONTRIBUTORS

Aims and Scope

This new journal provides an international forum for scientists, planners and practitioners concerned with problems of emergencies and disasters. Due to the obviously multi-faceted nature and global significance of problems encountered in research planning and operations connected with emergencies, the scope of *Mass Emergencies* will be multinational and international, as well as multidisciplinary and interdisciplinary.

The journal promotes the publication of material concerning scientific inquiries, planning, organization, output, communications and operational activities bearing on the prevention of emergencies and disasters, disaster detection and warning systems; problems created by public and private responses to disaster warning under emergency conditions; disaster trajectories and impact; intervention and rescue strategies; including problems of recovery and reconstruction.

While each issue of the journal may deal with a variety of relevant topics, special issues dealing with particular types of emergency and disaster situations will be published whenever it is possible to bring the expertise of scientists, planners and practitioners together in a specific problem area.

Types of Contributions

- Research reports, including material on the "state of the art," research designs and research findings.
- Articles generated by planners, whether they pertain to the current state of plans or organization; to identification of problems requiring planning or replanning; to issues of plan implementation; or experiences which have to do with the whole process of plan formulation, adoption and implementation.
- Contributions of practitioners who are responsible for, or knowledgeable about, acting under emergency and disaster conditions.

It would be greatly appreciated if contributors were to follow the following suggestions concerning manuscript preparation. Please submit three typed copies of the paper, in English, reproduced on one side of good quality opaque paper. (An additional copy should be kept by the author). Type the text, including tables, legends to illustrations, references, notes, and brief biography, double-spaced. Allow margins of at least one inch on all sides of the typed pages. Number the manuscript pages consecutively throughout the paper.

Your footnotes should be brief. They should be limited to those essential to explaining a point in the text and not combined with References to the Literature which are to be placed in a separate list.

Please cite references by typing, in the text line, the author's (or authors') name(s) followed by year of publication (enclosed in parentheses). If more than one paper of an author appears from the same year, then the citation should read, for example, (Jones, 1966a) and (Jones, 1966b). List complete reference citations alphabetically on a separate sheet of the manuscript according to the following system:

Articles. Authors' names; year of publication (in parentheses); title of article; title of periodical; volume no.; and page no.

Example: Schneider, David (1957). "Natural disaster and political crises in a polynesian society," *Human Relations* 10: 3-27.

Books. Authors' names; year of publication (in parentheses); title of book (if multi-author volume, title of contribution followed by editors' names, title of book); part or volume no. (abbreviated to Vol); no. of edition; page no. preceded by p. or pp.; publisher's principal address; and publisher's name.

Example: Prince, Samuel H. (1920). *Catastrophe and Social Change*. New York: Columbia University Press.

Each of your tables should have a title. Place all footnotes to a table at the end of the table. Define all data in the column heads. Every table should be fully understandable even without reference to the text. Type all tables on separate sheets; do not include them within the text. Indicate in the text where the table is to appear.

Figures (i.e. any illustrative material that cannot be typed), should be supplied in directly reproducible form — drawings in Indian ink or sharp black and white photographs are the best.

Finally, it is very important that we have your full name, affiliation and complete postal address; the affiliation will appear on the title page, and the address is needed for sending out proofs.

Please send your contributions to: Dr. Jiri Nehnevajsa,
University Center for Urban Research,
University of Pittsburgh,
249 North Craig Street,
Pittsburgh, PA 15260, U.S.A. or
